Client: Efast Delivery

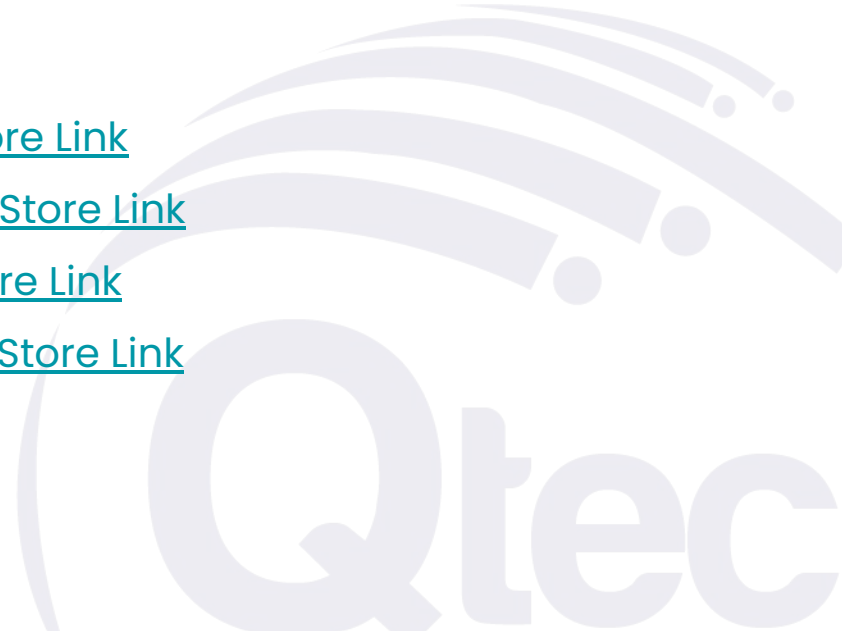

The screenshot displays the Efast Delivery web application interface. At the top, there is a navigation bar with the Efast logo and various menu items in Bengali. Below the navigation bar, there is a search section with a 'Search By' dropdown and input fields for 'Tracking ID', 'Shop or Invoice ID', 'Phone number or Customer Name', and 'Search Date'. A 'Search' button is located to the right of these fields. Below the search section, there is a table titled 'আপনার সব অর্ডার (2034)' (Your all orders (2034)). The table has columns for 'Creation Date', 'Pickup Location', 'ID', 'Shop', 'Customer Details', 'Status', 'Payment Info', 'Last Updated', and 'Action'. There are four rows of order data, each with a checkbox in the 'Creation Date' column. The 'Status' column for all orders shows 'Pending'. The 'Action' column for each row contains links for 'Edit', 'Delete', 'Raise Issues(0)', and 'Status Track'.

Software quality assurance

We did the Software Quality Assurance for the Bangladeshi Payment Gateway 'Aamar Pay.' We tested their complete system and wrote more than 850 test cases. After completion of the QA process we provided a report with certificate.

Qttec Team with the CEO of 'Aamar Pay' Mr. A M Ishtiaque Sarwar

We got featured

কালের কণ্ঠ

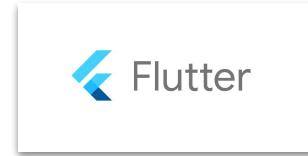

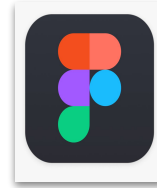

We have been featured at the daily famous newspaper in Bangladesh. They have acknowledged our good work and inspired with the publication. On the right photo, you can see our team's group photo.

[Watch our video →](#)

Technologies we use

1. Figma
2. Flutter for iOS & Android App
3. Django/Python for Backend Softwares
4. Nuxt/Vue JS for front end
5. SQL /NoSQL Databases
6. AWS/DigitalOcean for hosting
7. MERN Stack (new)

How we work

Step 1: Requirement Analysis

Step 2: Budget and timeline

Step 3: Build the architecture

Step 4: Launch the beta version

Step 5: Add secondary features

Step 6: Complete Launch

Step 7: Support and maintenance
